Unisem and KVD Announce Strategic Partnership To Share Testing Facilities and Equipment in the United States

Deal Provides Unisem Sunnyvale Facility with Additional Analog Testing Capacity

Sunnyvale, CA – February 4, 2008 – Unisem (M) Berhad today announced that KVD, a leading provider of test solutions for the analog dominant device market, will be leasing part of Unisem's Sunnyvale testing facilities for KVD's state-of-the-art analog testing services and solutions for final test and wafer sorting. KVD will have its own engineering staff onsite and will utilize Unisem's onsite training facilities to provide classes for engineers and operators to allow them to get up to speed quickly on the latest analog testing equipment.

The partnership is focused on final testing and probe for linear, power management, sensor and MEMS customers, which aligns with the expertise of both Unisem and KVD. Additionally, Unisem Sunnyvale will host the KVD equipment as an incubator for analog fabless and startup companies, so they can have access to a world-class package and test operation.

"Unisem was our primary choice for a partner in the analog testing market, as it provides many years of reliable production and consummate packaging experience," said Ross Martindale, vice president of business development at KVD. "KVD brings 20 years of analog test experience and has products that are easy to use, cost-effective and well suited for parallel testing."

"This partnership will not only allow Unisem to work more closely with our valued partner, but will also provide both companies with an opportunity to drive additional business, as it will open us up to new customers that we could not individually serve before," said James Cook, president of Unisem Test Sunnyvale.

About KVD

KVD Company, Inc. is a leading supplier of cost effective semiconductor automated test equipment for the Linear, Power Management and low cost Mixed Signal markets. The Company is headquartered in Carlsbad, California, with sales, service and applications offices in Austin, TX, Boston, MA, Colorado Springs, CO and San Jose, CA. KVD's strategy is to provide a family of ATE products which are easy to use and deliver both productivity improvements and high return on investment. For more information please contact sales@kvdco.com or call 408.416.4500. Visit the company's Website at www.kvdco.com.

About Unisem

Unisem is a global provider of semiconductor assembly and test services for many of the world's most successful electronics companies. Unisem offers an integrated suite of packaging and test services such as wafer bumping, wafer probing, wafer grinding, a wide range of leadframe and substrate IC packaging, wafer level CSP and RF, analog, digital and mixed-signal test services. Our turnkey services include design, assembly, test, failure analysis, and electrical and thermal characterization. With approximately 9,500 employees worldwide, Unisem has factory locations in Ipoh, Malaysia; Wales, United Kingdom; Chengdu, People's Republic of China; Batam, Indonesia and Sunnyvale, USA. The company is headquartered in Kuala Lumpur, Malaysia. For more information about Unisem, please visit www.unisemgroup.com.
